

## **RESHAPING LIGHT SOURCE MODULES AND ILLUMINATION SYSTEMS USING THE SAME**

### **ABSTRACT**

5           Light source modules are disclosed, which include an emitter having a light-emitting  
surface and a pyramid collector mounted onto the emitter over the emitting surface. Also  
disclosed are illumination systems, including a plurality of light source modules, each light  
source module comprising an emitter having a light-emitting surface and a pyramid collector  
mounted onto the emitter over the emitting surface. The illumination systems further include  
10   an illumination target and a system of optical elements disposed between the at least one light  
source module and the illumination target.
